

Using the Bluetooth Remote

Overview:

This Home Builder Tool will allow you to use your phone as a remote control for the X2 Controller with Wand module only. To reduce maintenance time, eliminate having to return to the controller to manually start/stop zones when Wi-Fi is not present, and bypass the need for a SmartPort® wiring harness and ROAM Remote, add a **WAND Module to any X2™ Controller**. Then simply connect via Bluetooth® using the Hydrawise App! Hydrawise has a new Bluetooth Control screen that allows remote operation for manual single and all-zone run commands. This feature works up to 75' (23 m) away from the controller location, providing easier zone diagnostics, winterization, and site maintenance.

1. Sign in to your [Hydrawise account](#) [1]. From the **HOME** screen, select the (☰) icon in the upper left. Then **BLUETOOTH CONTROL**.
2. Select the module listed from the **WAND** list. Select **RESCAN** if necessary.
3. If your mobile phone asks for a **PAIRING REQUEST**, accept by selecting **OK**.
4. A 6-digit number will appear on the X2 Controller. **ENTER** the full PIN here and select **OK**.
5. The **REMOTE CONTROL** feature will appear. The **CONTROLLER STATUS** will display any current zones running. Using the two drop-downs, you can select a **SINGLE ZONE** or **RUN ALL ZONES** in sequential order. Enter a **RUN TIME** in minutes. Select **START** and the system will begin watering via Bluetooth connection.
