

Controller Status

The **CONTROLLER STATUS** feature will allow you to determine the status of your internet connection. The three message options below will display on the home dashboard with an explanation of each status.

Status

All Good

No Internet Connection

Waiting for Controller

Description

The controller is connected to Hydrowise and has the latest configuration.

The controller is not connected to Hydrowise. We detect this within 7 minutes. [Learn More](#) [1]

The controller is missing the serial number. [Learn More](#) [2]
