

Using the Irrigation Skipped Alert

About the alert

The **IRRIGATION SKIPPED** alert allows the user to be notified when the irrigation will not run from either an open circuit on a [sensor](#) [1] (e.g; wet rain sensor) or system was aborted from a [water trigger](#) [2] (e.g; aborted due to high probability of rain). The alert will trigger a notification (In-app, email, and/or SMS text) before your first program start time of the day.

Creating the Alert

Please view the steps to access this action:

1. Login to your Hydrowise account. Select the mobile **MENU** icon on the upper left-hand side of the screen. If using a computer (PC), select the **MENU** icon on the upper right-hand side of the screen.
2. Under my account, select **ALERT**. Click on **ADD NEW ALERT**.
3. Choose **ALERT NAME** (e.g., Missed Irrigation from MiniClik) and **ALERT TYPE - IRRIGATION SKIPPED**. Click **NEXT**.
4. Choose from drop-down to apply to all **CONTROLLERS/SENSORS** or **SELECT** specific controllers. Click **NEXT**.
5. Under **ACTIONS**, check the boxes for the desired notification. Click **OK**.
 - Add event to the event log: You will see this action in your logs along with other settings changes in the software.
 - Send App Notification: This will show up on your phone banner on the home screen.
 - Send SMS/Text Notification - This will allow the user to receive a text when an alert was triggered (Enthusiast plan only).
